Subject: They just keep lying...

To whom it may concern,

If you want to find out more lies that Microsoft keeps spinning you can look at the following site. You would think that they would have learned their lesson, but no. They just can't try and make a superior product. They want to own everything in the Computer Technology. They want to have all of the Networking business so bad that they lie about out product, which they know is much better than theirs.
